

Greatec™ M845™ *Wide Base Radial*

Engineered for High-Traction/High-Scrub Applications

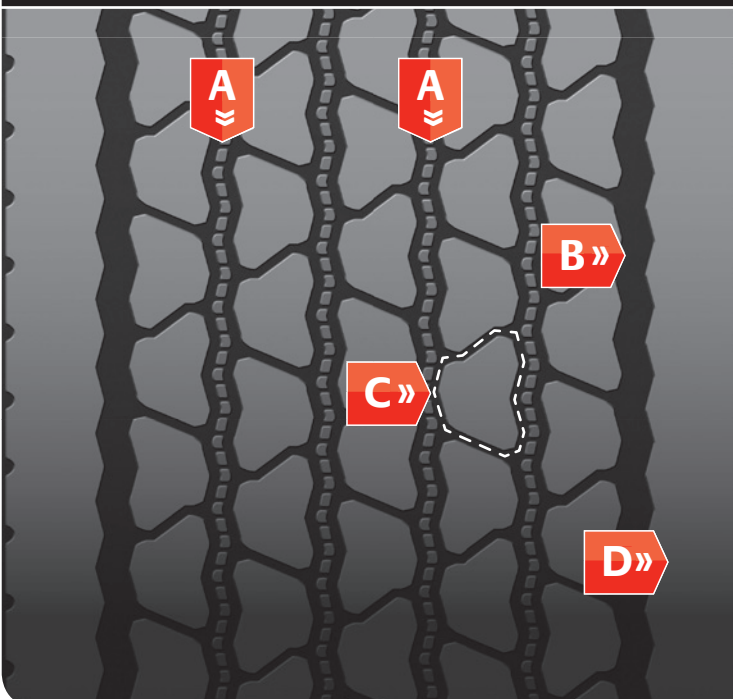

Enhanced retreadability ■ Casing durability ■ Long, even wear

PRECISELY THE RIGHT TIRE.

The Greatec M845 455/55R22.5 offers features made for high-scrub, urban environments. Because it's a wide base tire, it allows for heavier loads, which means fewer trips for your trucks. It comes with next-generation WavedBelt™ technology that helps reduce irregular shoulder wear. Plus, its high-quality Bridgestone casing is highly retreadable.

Greatec M845 Innovations

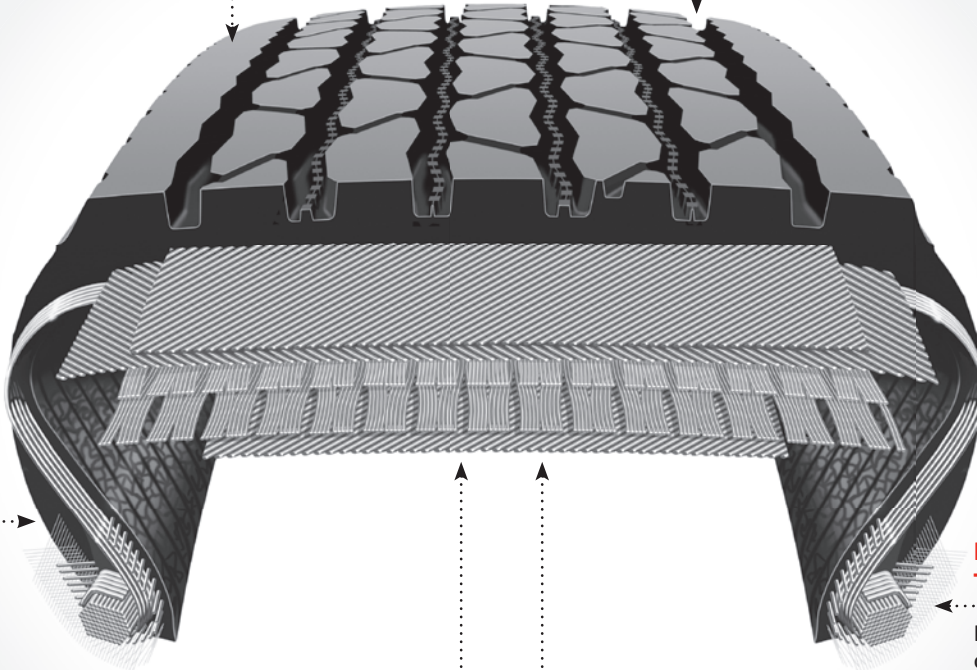

- A Stone Rejector Platforms**
Prevent trapped stones from pushing deeper into tread grooves and piercing belt layer, damaging belts and exposing them to rust.
- B Wide Grooves**
Help reduce risk of groove cracking and combat retention of damaging stones for enhanced retreadability.
- C Aggressive Block Pattern**
Designed with multiple gripping edges to promote wet traction.
- D Continuous Shoulder**
Offers long, even wear and reduced rolling resistance by controlling movement of the ribs and blocks during rotation.

Special Tread Compounds

Long-wearing, scrub-resistant design delivers high removal mileage in urban/regional applications.

Extra-Deep and Extra-Wide Tread

Aggressive design delivers solid traction, long life and excellent handling.

Tough Sidewall Protection

Reinforced sidewalls minimize scuff damage and curb abrasion during frequent stopping and starting.

Optimized Belt Design

Width and location of next-generation WavedBelt technology enhances durability and lowers rolling resistance by reducing deformation around the belt area.

Next-Generation WavedBelt™ Technology

Exclusive next-generation design helps minimize irregular wear, especially at the shoulder area, by keeping crown shape to wearout.

Patented Turn-In Ply™ Design

Promotes casing durability by wrapping the body ply around the bead bundle to reduce ply-end stress.
